

ACE Money Transfer

Pricing - Transparency Statement

At ACE Money Transfer, we are committed to ensuring transparency and clarity in all aspects of our services, including the pricing of money transfer transactions. Our approach to fees and commissions is designed to provide our customers with a comprehensive understanding of the costs associated with their transactions.

Here is a breakdown of the fees and commissions we apply:

Charges:

The charges associated with our Money Transfer Service are dependent on various factors, including the amount being transferred, the country of transfer origination, and the destination country. We believe in transparency, which is why we present the applicable charges to our customers for their acceptance before proceeding with the initiation and execution of the transaction. This allows our customers to make informed decisions and understand the exact cost of the service they are choosing.

Forex Margins:

Forex Margins represent the variance between the forex rates offered to our valued customers and the rates we receive in the foreign exchange market. Our exchange rate for the Money Transfer Service is meticulously calculated using bank exchange rates prevailing in the international currency markets. Additionally, a margin (spread) is applied to each transaction, which varies based on the currency and the destination country. It is important to note that the margin applied will never exceed 9% of the reference rate.

We are committed to providing our customers with utmost clarity on exchange rates. The exchange rates we offer are regularly always updated and accessible on both the ACE Website and Mobile App. However, it is important to understand that exchange rates are subject to frequent and unpredictable fluctuations. This is due to the dynamic nature of the reference criteria used in their calculation, such as the purchase value of foreign currencies in the international currency markets.

Transparency Assurance:

To ensure that our customers have a clear understanding of the costs associated with their money transfer transactions, we provide them with the exact exchange rate and charges/fees that will be applied to their transaction before they proceed to use our service and create the transaction. This way, they have a complete picture of the expenses involved and can make an informed decision that aligns with their financial preferences. For detailed understanding of our fee and commission structure, please refer to [Annexure A](#).

Annexure A
